PROJECTS

Voice Based Email — Machine Learning

Use of the keyboard is completely eliminated; the user will have to respond through voice and mouse click only.

Movie Recommender System — Machine Learning, Python

Created a Full - Stack Content based Recommender System which recommends movies based on the genre of the given movie, Used Streamlit to make a website using Python.

Student Report Management System — CSS, HTML, SQL

Created a fully functional website where we could store student reports in a Database and then retrieve it.

Smart Chatbot — Deep Learning

Smart chatbots designed to simulate near-human interactions with users. It can have free-flowing conversations and understand intent, language, and sentiment. Sarcasm is not understood by this bot.
